## Diabetic Supplies

### Precision Xtra® Blood Glucose and Ketone Monitoring System

Simple testing with Xtra Assurance and Control. Patented SmartChip Technology upgrades the meter to receive the latest test strip technology without switching meters. Features simple 2-step testing with easy-to-read display and backlight. Fast 5-second test time and small 0.6mL sample size for glucose testing. Tests both blood glucose and blood ketone with one simple to use meter. Stores up to 450 results with date and time. Provides results in 7, 14, and 30 day averages. Results can be downloaded. System includes meter with two AAA batteries included, adjustable lancing device with alternate site testing cap, 10 lancets, log book, carrying case, and user's guide. Lifetime warranty. Use with Precision Xtra® Test Strips only.

### Precision Xtra® Blood Glucose Test Strips

Unique chemistry minimizes the potential interfering effects of many common medications. End-fill/Top-fill blood application with unique fill-trigger starts test only when enough blood is applied. Fast 5-second test time and small 0.6mL sample size. Individually foil wrapped test strips protect against air and moisture.

### Precision Xtra® Ketone Test Strips

Provides real-time measurement compared to 2-4 hour wait in most urine ketone measurements. Features end-fill/top-fill blood application with unique fill-trigger; starts test only when enough blood is applied. 10-second test time and small 1.5mL sample size. Individually foil-wrapped test strips protect against air and moisture.

### Normal Control Solution

For use with OptiumEZ and Precision Xtra® test strips, 0.3mL.

## Keep track of your blood glucose checks

using your blood glucose monitor or record book. Your blood glucose check results will help you and your health care provider make a plan for keeping your blood glucose under control. Always bring your monitor or record book to your doctor visits so you can talk about reaching your glucose goals.

## Agamatrix, Inc

### Presto™ Blood Glucose Monitoring Kit

Features No-Code technology and Wavesense Dynamic Electrochemistry™ for safe, accurate results that automatically corrects for errors caused by environmental conditions, sample and manufacturing variations and user error. Uses a small 0.5mL sample size and delivers results in 4 seconds. Also includes an easy-to-read backlit display and non-slip rubber grips. Allows for alternate site testing and stores up to 300 test results. Includes meter, carrying case, lancing device, 10 lancets, control solution normal, alternate site testing cap and owner's guide. Limited lifetime warranty. Use with Presto™ test strips only.

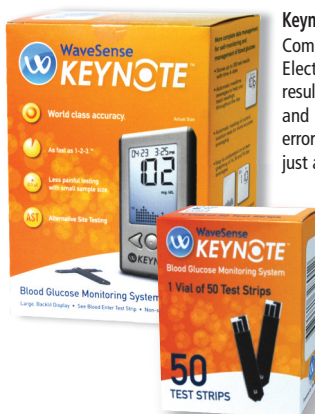

### Presto™ Test Strips

To be used with Presto™ Meter only. Strips include a test strip fill window for confirmation of adequate blood sample. Uses just a small 0.5mL blood sample to provide accurate results. Wavesense™ technology automatically corrects for common sources of error such as environmental conditions, sample and manufacturing variations.

### Presto™ Control Solution Normal

For use only with Presto™ meters and strips.

### Bayer's BREEZE®2 Blood Glucose Monitoring System

Received the Ease of Use Commendation from the Arthritis Foundation. Features a unique 10-test disc that eliminates the need to load, unload and handle small individual test strips, which often can be a challenge for people with arthritis.

Uses a small 1.0mL sample size and gives results in just 5 seconds. Offers No Coding™ technology, which means fewer steps in the testing process, and also helps ensure accurate readings. Test results for up to 420 tests can be saved. Features download capability using winGLUCOFACETS® Diabetes Management Software for flexible diabetes data management. Approved for alternate site testing. Kit includes Bayer's BREEZE® 2 Blood Glucose Meter with a CR025 3V lithium battery, 10 test strips, Normal Control Solution, MICROLET™ Adjustable Lancing Device with 5 lancets, CLINILOG™

Record Diary, Quick Reference Guide, User Guide, carrying case and warranty card. 5 year warranty. Use with BREEZE® 2 Test Strips only.

### Bayer's BREEZE®2 Blood Glucose Test Strips

Disc is loaded onto the meter to provide up to 10 tests at a time without reloading. Uses just a tiny amount of blood and has a fast-filling sensor with lab comparable results. To be used only with Bayer's BREEZE®2 Blood Glucose Monitoring System.

### Bayer's BREEZE®2 Normal Control Solution

## Lifescan, Inc.

### OneTouch® Ultra® 2 System

The OneTouch® Ultra® 2 Meter is a fast, gentle, and simple way to see the effects of food on your blood sugar. View before-and-after meal averages, see the impact of your food choices, and see the effect of food and portion choices over time. Meter can be set to operate in Spanish. Stores up to 500 blood glucose tests. Kit includes: OneTouch Ultra® 2 Meter with batteries (CR2032), User Guide, OneTouch® Lancing Device, OneTouch® UltraSoft® Lancets. 3-year warranty. For use with OneTouch® Ultra® Test Strips only.

\*Before testing on forearm or palm, patient should read the Owner's Booklet and talk to a healthcare professional.

### OneTouch® UltraSmart™ System

The OneTouch® UltraSmart® Meter helps you see the trends and patterns caused by food, medication, stress and exercise. It is the only meter proven to help you reduce A1C. It automatically collects and organizes results into useful charts--like average by time of day. Kit includes: OneTouch® UltraSmart® Meter with batteries (CR2032), User Guide, OneTouch® Lancing Device, and OneTouch® UltraSoft® Lancets. 3-year warranty. For use with OneTouch® Ultra® Test Strips only.

\*Before testing on forearm, patient should read the owner's booklet and talk to their healthcare professional.

## NEW! OneTouch® Ultra® Blue Test Strips

Features DoubleSure Technology that performs two separate glucose tests, compares them, and then provides the results or communicates if the test was not successful. Each test strip is glucose specific, which prevents false reads from certain sugars contained in some medicines patients may be consuming. For use with OneTouch® Ultra®, OneTouch® UltraMini®, OneTouch® Ultra® 2, OneTouch® UltraSmart®, OneTouch® UltraLink®, and OneTouch® Ping™ Meters.

### OneTouch® Ultra® Control Solution

For use only with OneTouch® Ultra tests trips. The vial contains sufficient volume for 75 tests. Patient should read package insert before using this product.

Preapproval required to order Home Delivery or DME/Home Delivery product.

## Diabetic Supplies / Lancets & Lancing Devices

### Prodigy® Voice Blood Glucose Monitoring System

Provides total independence for the blind or low vision diabetic. A totally audible, No-Code meter that talks the user through all set-up steps, testing, and memory recall with date and time. No coding technology provides ease of use with safe, accurate test results and less chance of user error. Delivers audible results in just 6 seconds with just a small 0.6mL blood sample. Repeat button to display last message spoken. Stores up to 450 test results with date and time and provides 7, 14, 21, 28, 60 and 90 day test averaging. Award winning meter by the National Federation for the Blind and American Foundation for the Blind. Includes meter with batteries, 10 test strips, 10 lancets, a lancing device with AST cap, carrying case, log book, owner's manual, quick reference guide, and warranty card. Limited lifetime warranty. For use with Prodigy Autocode® test strips only.

## Roche Diagnostics

### ACCUCHEK® Aviva Blood Glucose Monitoring System

Tests right the first time to make every strip count. Quick fill test strip is easy to handle. System checks itself so you can have confidence in the results. Quick 5-second results using just a 0.6mL blood sample. Nonslip rubber grips provide a more comfortable and secure grip. Downloadable 500 value memory with 7, 14, and 30 day averaging. System has 4 test reminders, event flagging and hypo indicator. The system has over 150 automatic checks to detect and prevent unreliable results. Features the easy to use ACCU-CHEK® Multiclix lancing device with proven least painful lancing device technology. Load and go drum of 6 preloaded lancets- no lancets to see or

handle. Includes meter, battery, ACCU-CHEK® Multiclix lancing device with 12 lancets (2 drums), clear cap for non-finger-tip testing, carrying case, instructions, self-test diary, and warranty card. 3 year warranty. Test from fingertip, palm, forearm, upper arm, thigh, or calf. Use with ACCU-CHEK® Aviva test strips.

### ACCUCHEK® Aviva Test Strips

The wide-mouth dosing area is designed so you can fill the strip on the very first try with just 0.6mL of blood. A larger, wider strip is easy to use for people of all ages. Electrodes at top of strip work with meter technology to help detect and prevent unreliable results. Use with ACCU-CHEK® Aviva meter.

### ACCUCHEK® Aviva 2 Level Glucose Control Solution

For use with ACCU-CHEK® Aviva System. Two 2.5ml bottles of control solution, one for high-level test and one for low-level test.

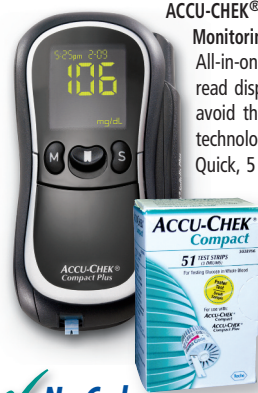

Preapproval required to order DME/Home Delivery product.

**✓ No Code Technology!**

## ACCU-CHEK® Compact Plus Blood Glucose Monitoring System

All-in-one convenience with the least pain. Bright and easy to read display. Load-and-go drum of 17 preloaded test strips to avoid the hassle of dealing with individual strips. No coding technology means fewer steps and less chance of user error. Quick, 5 second test results. Downloadable 500 value memory with 7, 14, and 30 day averaging, 3 test reminders, event flagging and hypo indicator. Features detachable ACCU-CHEK® Softclix Plus lancet device with proven least painful technology, and 11 customizable depth settings for different skin types. Includes meter, batteries, ACCU-CHEK® Softclix Plus lancing device, lancets, a clear cap for non-fingertip testing, carrying case, instructions, self-test diary, and warranty card. 3 year warranty. Use with ACCU-CHEK® Compact test strips.

## ACCU-CHEK® Compact Test Strips

The 17-test drum integrates the test strips into the meter providing the convenience of an all-in-one system without strip handling. Automatic calibration when test drum is loaded. At the touch of a button, a strip slides out, ready for testing. Capillary action pulls blood into the strip. Press the button again to eject the used strip. For use with ACCU-CHEK® Compact Plus meter.

## ACCU-CHEK® Compact™ Blue Glucose Control Solution

Mid/High level control solution for use with ACCU-CHEK® Compact Plus System.

Preapproval required to order DME/Home Delivery product.

## Lancets & Lancet Devices

### Invacare® Supply Group

#### Invacare® Lancing Device

Fully adjustable lancing device assists patients in monitoring their glucose levels easily and safely. Five adjustable depth settings that adjusts to match different skin types; 4 - 5 for hard to penetrate skin, 3 for average skin and 1 - 2 for soft skin. Made to use with any standard/universal lancet.

Product #	Available UOMs	HCPCS
<b>ISG171510</b>	Ea, Cs100	A4258

#### Invacare® 30 Gauge Lancet

A 30-gauge pull-top lancet with a precision cut tip that allows skin penetration virtually pain-free, yet allows the user to get the proper amount of blood needed to test the first time. Its two-piece construction insures that the lancet is free from any plastic debris and provides for an easier and safer disposal after each use. Product is triple inspected for safety with each lot inspected by an independent lab for sterility.

Product #	Available UOMs	HCPCS
<b>ISG171281A</b>	Sterile	Bx100 A4259

#### Invacare® Bullseye Safety Lancet

Single use retractable lancet with a one-of-a-kind "Color Indicator" that disappears after the device has been used and eliminates potential for cross contamination. Each lancet has been individually wrapped for maximum sterility. The lancet also offers a locking safety cap, which ensures safe disposal. Offers patients and health care professionals unrivaled safety and security. Ergonomical design makes the lancet easy to handle and the quick spring action increases patient comfort. Tri-Beveled Needle. Easy to use, pre-cocked and ready to use. Two simple steps: remove cap and fire. Adheres to all regulations set forth by OSHA.

Product #			Available UOMs	HCPCS
<b>ISG171231</b>	23 Gauge	Normal Flow	Bx100, Cs20	A4259
<b>ISG171232</b>	25 Gauge	Low Flow	Bx100, Cs20	A4259

## Abbott Diabetes Care

#### FreeStyle® Sterile Lancets

28 gauge. Can be used with most lancing devices.

<b>TSI13001</b>	28	Bx100	A4259

## Bayer Healthcare

#### Bayer's MICROLET®2

##### Adjustable Lancing Device

Advanced technology for precise guided delivery means less pain and the smallest blood sample. Unique ergonomic design handles more easily. Choice of five depths of penetration.

Product #	Available UOMs	HCPCS
<b>AMS6606</b>	Ea	A4258

## How do you get high blood glucose?

Glucose comes from the food you eat and is also made in your liver and muscles. Your blood carries the glucose to all the cells in your body. Insulin is a chemical (a hormone) made by the pancreas. The pancreas releases insulin into the blood. Insulin helps the glucose from food get into your cells. If your body doesn't make enough insulin, or if the insulin doesn't work the way it should, glucose can't get into your cells. It stays in your blood instead. Your blood glucose level then gets too high, causing pre-diabetes or diabetes.

# Lancets & Lancing Devices / Insulin Pumps

## Owen-Mumford

### Unistik® 2 Capillary Blood Sampling Device

Unique single-use mechanism avoids needle stick injuries and prevents cross-infection. Side firing action provides extra comfort for both patient and professional. Yellow cap "Normal" is for normal skin types and standard tests such as blood glucose monitoring in adults and cholesterol testing.

Product #	Gauge	Available UOMs	HCPCS
<b>OWNAT0702</b>	21 Gauge	Bx100	A4259

### Unilet® Excelite II Lancet

Designed as a premium quality cost-effective lancet. Provides optimum blood flow, comfortable and versatile for finger or alternate site testing. Enhanced cap surface for easy removal. Unique body shape for easy insertion and removal into most lancing devices.

Product #	Gauge	Available UOMs	HCPCS
<b>OWNAT0535</b>	28 Gauge	Bx100	A4259

### Unistik® III Lancets

Unistik® III is pre-set and ready for use. Just twist off the protective sterile cap and take the sample. The needle point is hidden before use and automatically retracts after use to avoid accidental needlestick injuries and cross infection. It features unique Comfort Zone Technology that allows ultimate control and comfort when lancing, targeting the sensation and perception of pain. This masks the pain of lancing to maximize comfort.

## Insulin Pumps

### Animas

#### One Touch® Ping™ Glucose Management System

The first full featured insulin pump that wirelessly communicates with a remote blood glucose meter. Allows the user to calculate insulin doses and opt to wirelessly instruct the pump to deliver insulin without touching the pump at all. The remote meter is capable of dosing the necessary bolus of insulin with its own bolus calculator and stores the nutritional value of 500 food items from the CalorieKing® food database for easy and accurate carb counting. Automatically calculates a correction dose using the last reading and keeps track of bolus insulin that has been delivered and still active in the body preventing hypoglycemia. Pump can be clipped to a belt, tucked in a pocket or secured under clothing. Waterproof up to 12 feet for 24 hours. Flat panel color screen provides outstanding readability under any conditions. The pump delivers the smallest basal increment(.025U/hr) available and a bolus rate as low as .05 U/hr for fine-tuned dosing to more precisely match patients needs. 4 year warranty on meter and insulin pump.

**New and Improved!**

## Minimed

**NEW!**

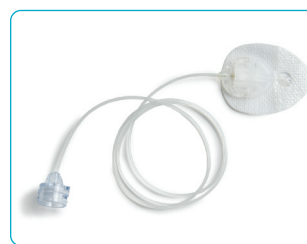

### Minimed® Paradigm Revel™ Insulin Pump

Reaches a whole new level of therapy management and comes with link and software. Compact, portable and lightweight design; about the size of a cell phone measuring 2.0 x 3.6 x 0.8 inches and weights just 108 grams

with a full cartridge. Can hold up to 300 units of insulin in the reservoir and can use either of the two Paradigm reservoirs — the 1.76 ml (MMT-326A) or the 3.0 ml (MMT-332A) reservoir. Features Predictive Alerts that can be set to warn you up to 30 minutes before your low or high glucose limits are reached. The pump alerts you when your glucose levels are changing rapidly for different times of day or night and allows you to set low and high alerts up to 8 different thresholds to meet your needs. REAL-Time Trend Graphs at 3, 6, 12 and 24 hour intervals give you a clear picture of your glucose levels over time. The Bolus Wizard® Calculator does the math for you and simplifies insulin doses, reduces math errors, and uses an "active insulin curve" to factor in the amount of active insulin left in your body to help prevent "insulin stacking" Delivers multiple basal rates as low as 0.025 units per hour, and sets up insulin-to-carbohydrate ratios as low as 1 to 1 to match your insulin needs to respond to changes in activity levels, stress, illness, or other events. Missed Meal Bolus Reminder for those who tend to forget to take insulin for your meal to help avoid hyperglycemia after meals.

Caution: US law restricts this device to sale by, or on the order of a physician.

### Silhouette™ Full Infusion Set

The comfort of an angled insertion with the convenience of disconnecting at the infusion site. All in a discrete, low-profile design. Works with the Sil-Serter™ to provide optimal insertion every time! Offers the convenience of self-adhesive (no overtopping) and the option to choose your insertion depth. With a variable-

angle (35°) cannula, the Silhouette™ infusion set is generally good for extra lean adults or even some children who have less depth to their body fat in which to place the cannula.

Caution: U.S. law restricts this device to sale by, or on the order of a physician. Paradigm Infusion Sets are only compatible with the Paradigm Pump.

## Quick-set® Infusion Set

Features a 90° insertion angle, an at-site disconnect, an insertion device and a soft, tapered cannula. The Quick-set® infusion set for 400/50X model insulin pumps (includes 407C, 504, 506, 507, 507C and 508 model Medtronic® Diabetes pumps) and the Paradigm® family of insulin pumps offers the convenience of self-adhesive (no over taping) and is available in two tubing lengths and two cannula lengths. The 6 mm length cannula is most suitable for lean individuals. The 9 mm cannula is recommended for everyone else. The Safe Needle Disposal System of the Quick-set® helps prevent "accidental sticking" when disposing of the introducer needle in a sharps container. The Quick-set® works with the Quick-serter® to provide optimal insertion every time!

Caution: U.S. law restricts this device to sale by, or on the order of a physician.

## Diabetic Foot Disease

From the WebMD

Diabetes foot disease is a major burden for both the individual and the health care system and may increase as the population ages. Fifteen percent of all patients with diabetes in a population-based study experienced ulcers or sores on the foot or ankle. The prevalence increased with age, especially in patients who were age 30 or under at diagnosis of diabetes.

## Diabetic Shoes

Diabetic shoes are lightweight, preventing extra pressure on the sensitive diabetic foot. Made for both men and women with breathable vamp and Velcro closures. A balance of function and compliance are designed into each Stride-Lite™ diabetic shoe meeting the need for protection and comfort of the at-risk foot. Most shoes offer the option of Velcro® strap or Velcro® laced type closures.

## BD™ ULTRA-FINE™ Insulin Syringes

BD™ engineers every Ultra-Fine™ Syringe to be thinner and smoother for a more comfortable and less painful injection. Design features include Electro-Polishing that polishes away microscopic burrs giving every needle a smooth finish, Micro-Bonded Lubrication process, that creates more glide and less friction. Fine-Point Technology shapes the tip of every needle as finely as possible for easier penetration using a three step process.

## BD™ SafetyGlide Insulin Syringe with Ultra-Fine™ Needle

Includes a permanently attached needle that is the only single-handed device available in 1/2 unit markings with a shielding mechanism. Ultra-Fine™ needles are designed to be thinner and smoother for a more comfortable and less painful injection. Electro-Polishing polishes away microscopic burrs giving every needle a smooth finish while the Micro-Bonded Lubrication process creates more glide and less friction, and Fine-Point Technology shapes the tip of every needle as finely as possible for easier penetration using a three step process.

## BD Medical

### BD™ Oral Syringe with Tip Cap

Clear oral syringes with tip cap. Features easy-to-read scale markings in both mL and teaspoon scale for accuracy to reduce the risk of medication dosing or administrative error. Latex-free.

Product #	Capacity	Available UOMs	HCPCS
<b>BND305219</b>	10ml	Bx100,Cs5	N/A
<b>BND305217</b>	1ml	Bx100,Cs5	N/A
<b>BND305220</b>	3ml	Bx100,Cs5	N/A

### BD™ Luer Tip Cap

The BD™ Tip Cap preserves sterility, enhances productivity and reduces waste. Latex-free caps are packaged for ease of application and minimizes risk of touch contamination. Cover peels back to access tip caps as needed, preserving sterility for remaining caps. Slip-on design allows quick application and self-venting feature reduces additional manipulation. Sterile.

Product #	Available UOMs	HCPCS
<b>BND308341</b>	Cs2000	N/A

### BD™ Safety-Lok™ Blood Collection and Infusion Set

BD Safety-Lok™ set includes 21 gauge needle with 12 inch tubing with luer adapter for blood collection and infusion. Manually activated safety shield to fully cover needle. BD Safety-Lok™ is designed to shield healthcare workers from exposed needles. Following venipuncture, a yellow transparent shield is moved over the exposed needle and locked into protective position, creating a barrier between the healthcare professional and the used needle. Sterile.

### BD™ Luer-Lok™ Disposable Syringe

1 mL syringe has 1/100 mL graduation. Features unique integrated BD Luer-Lok™ tip syringe with clear polycarbonate barrel. Barrel outer diameter is equal to the BD 3 mL syringe. Inner diameter is equal to the BD 1 mL slip-tip syringe. Latex free. Sterile.

Product #	Capacity	Available UOMs	HCPCS
<b>BND309628</b>	1ml	Ea, Bx100	N/A

### BD™ Safety-Lok™ Syringe

Bold scale markings facilitate accurate dose measurement. Crystal clear barrel and sleeve make syringe contents easier to see. Large flanges and tapered plunger rod increase control for easier aspiration and injection. BD Safety-Lok™ is the only safety-engineered syringe of its type to offer clear visual confirmation of the lock position. Lock confirmed when green band fully covers red collar. Efficient blister packaging minimizes storage space.

## Needles & Syringes

**BD™ General Use Hypodermic Needles**  
BD PrecisionGlide™ Needles are available in a wide range of

gauges, lengths, and bevel designs. The large inner diameter of thin wall needles is designed to allow the use of a smaller, more comfortable gauge size with increased flow rates over regular walled needles. Thin wall needles are also designed to facilitate the injection of high-viscosity fluids. Regular bevel. Sterile, Latex-free.

### What else can I do to prevent diabetes problems?

You can do many things to prevent diabetes problems. For example, to keep your feet healthy, check them each day. Ask your health care team whether you should take a low-dose

aspirin every day to lower your risk for heart disease. To keep your eyes healthy, visit an eye care professional once a year for a complete eye examination that includes using drops in your eyes to dilate the pupils.

Make sure your doctor checks your urine for protein every year. At least once a year, your blood creatine level should be checked. Also once a year, your health care provider should do a complete foot exam.

**Syringe Only (No Tip Shield)**  
For diabetic and other uses including post-operative conditions, vitamin deficiencies and intra-muscular medication. All needles and syringes are in easy-peel blister package. Other styles/sizes available as a special order. Sterile; latex-free.

### Why do you need to take care of your diabetes?

If you have diabetes, your risk of a heart attack is the same as someone who has already had a heart attack. Both women and men with diabetes are at risk. You may not even have the typical signs of a heart attack.

# Diabetic Supplies

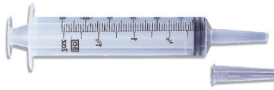

**Tuberculin Syringe with PrecisionGlide™ Detachable Needle**

<b>OWNAJ1300</b>	Ea	N/A

## What's a desirable blood glucose level?

Everyone's blood has some glucose in it. In people who don't have diabetes, the normal range is about 70 to 120. Blood glucose goes up after eating but 1 or 2 hours later returns to the normal range.

Ask your health care team when you should check your blood glucose with a meter, then write down your target levels.

## Needles & Syringes / Impotence Products

### Unifine® Pentip Pen Needles

Available in three lengths to suit individual patient requirements. Fits easily to all major drug delivery pens. Triple sharpened to allow optimal injection providing maximum comfort. Every box includes a free pen needle remover.

## Skin Care for Diabetics

### Alterna

#### Kerasal® Ultra20 Extra Strength Foot Cream

The foot care product of choice for dry feet, cracked heels and calluses. For those who want the softest feet possible but don't have time to wait for absorption, ultra20's advanced skin care therapy is a vanishing, no-fragrance cream that absorbs quickly. For best results, ultra20 Moisturizing Foot Care Therapy is recommended for use as a daily daytime skin care regime. A powerful formula that offers a highly effective, extra strength moisturizing formula that is guaranteed to soften even the worst dry skin. 2 oz size.

Product #	Available UOMs	HCPCS
<b>ALT85707400121</b>	Ea	N/A

#### Kerasal® 30gm Exfoliating Moisturizing Foot Ointment

The nation's #1 selling ointment for softening feet and controlling calluses build up, Kerasal's Moisturizing Foot Ointment is guaranteed to repair and soften even the toughest, dry feet, cracked heels and calluses when used as directed. Kerasal's Exfoliating Moisturizing Foot Ointment is a highly effective, dual action formula that both exfoliates and moisturizes in one step and is guaranteed to soften even the most severely damaged, dry feet. 30gm (1 oz) size.

Product #	Available UOMs	HCPCS
<b>ALT85707400101</b>	Ea	N/A

#### Kerasal® Exfoliating Pumice Paste

Made from real pumice stone, Pumice Paste is an exfoliating agent, which sloughs off surface layer skin cells common with cracked heels, dry skin and calluses. Scoop out a small amount of paste and scrub feet in the shower for best results. Kerasal's Exfoliating Pumice Paste includes natural oils and emollients, which restores moisture to the skin making it an essential part of any natural skin care regime. It's proven formula offers a highly effective, dual action formula that both exfoliate and moisturize. Perfect for even the most sensitive skin, it will repair even the most damaged, dry skin and calluses. 2.5 oz size.

Product #	Available UOMs	HCPCS
<b>ALT85707400104</b>	Ea	N/A

#### Kerasal® Callus Removal Cleansing Pads

A unique innovation that will help control callus build up while reducing the chance for infection. These callus pads have an abrasive side for softening calluses with a built-in cleanser on the other to disinfect. Traditional pumice stones and files often become unsanitary after just a few uses. With Kerasal's disposable pads, use a pad, throw it away. Kerasal® Callus Removal Cleansing Pads offer a highly effective solution that exfoliates even the driest feet and toughest calluses. Contains 10 pads.

## Genuine Virgine Aloe

### Diabetic Ulcer Healing Cream™

Fast healing for minor to severely damaged skin from diabetic ulcers, skin breakdown or other hard to heal skin irritations. This medical strength specialty cream contains more than 200 natural healing properties plus advanced healing ingredients to help promote fast tissue repair, safely and effectively. It contains NO Cortisone or fragrance. Daily use of this non-greasy cream helps maintain healthy skin. Item: GVA57025

### Diabetic Dry Skin Healing Cream™

This highly concentrated cream delivers fast healing for minor to extremely dry, damaged skin due to diabetes. It's more than a moisturizer. It contains medical strength ingredients to lock in vital moisture and help reinforce skin's natural protective barrier. AP4® Genuine Virgin Organic Aloe adds more than 200 natural healing properties, combined with two clinically proven skin protectants, plus Urea, Vitamins and Zinc for healthy skin. Non-greasy, Fragrance free. Item: GVA66025

### Diabetic Bruise Healing Cream™

This medical strength cream helps provide fast healing for those who bruise easily, have thin skin or heal slowly from medication, surgical procedures, diabetic conditions or simple skin trauma. It contains more than 200 natural healing properties, plus MSM and Arnica to soothe itching, calm redness and swelling, and help ease minor pain. Non-greasy, Fragrance free. Item: GVA65025

### Diabetic Foot Healing Cream™

This cream provides faster healing for dry, damaged feet, cracks and fissures due to diabetes or poor circulation. Daily use provides protection against skin breakdown. AP4® Genuine Virgin Organic Aloe, Urea, Zinc, Vitamins and clinically proven skin protectants help heal and maintain healthy feet. Non-greasy, Fragrance free. Item: GVA64025

## What is pre-diabetes?

Pre-diabetes is a condition in which blood glucose levels are higher than normal but not high enough for a diagnosis of diabetes. People with pre-diabetes are at increased risk for developing type 2 diabetes and for heart disease and stroke.

The good news is, if you have pre-diabetes, you can reduce your risk of getting diabetes. With modest weight loss and moderate physical activity, you can delay or prevent type 2 diabetes and even return to normal glucose levels.
