Lopez Enteral Valve®

The Lopez Valve is a stopcock like device, which allows the health care worker to access Enteral systems without breaking open the lines. This closed system protects the health care worker from exposure to bodily fluids that may carry blood borne pathogens such as HIV and Hepatitis C.

Product #	Sterility	Available UOMs	HCPCS
ICUM9000	Non-sterile	Ea, Bx50	N/A

CLC2000® Positive Pressure Connector

The CLC2000® by ICU Medical is a revolutionary catheter connector designed to provide a constant velocity of fluid; positive displacement, which exits the catheter upon disconnection of a luer.

Product #	Approximate Volume	Available UOMs	HCPCS
ICUCLC2000	0.06 ml	Bx50	N/A

MicroCLAVE® Neutral Displacement Connector

MicroCLAVE is a neutral displacement connector. This means that there is virtually no reflux of blood into the catheter lumen either when you connect or disconnect an administration device. Latex Free.

Catheter Securement

Zefon

NEW! Grip-Lok Individually Packaged

Grip-Lok® WA is a catheter stabilization device that is strong enough to lock catheters securely in place, yet versatile enough for almost any securement situation. The adhesive on Grip-Lok® WA will adhere and secure PICC hubs made from silicone, PVC and other plastic compounds. Grip-Lok® WA is latex-free and is packaged in individual sterile units, allowing you to use it close to a wound site or right in the sterile field.

Minimed*

Quick-set® Infusion Set

Features a 90° insertion angle, an at-site disconnect, an insertion device and a soft, tapered cannula. The Quick-set® infusion set for 400/50X model insulin pumps (includes 407C, 504, 506, 507, 507C and 508 model Medtronic Diabetes pumps) and the Paradigm® family of insulin pumps offers the convenience of self-adhesive (no over taping) and is available in two tubing lengths and two

cannula lengths. The 6cm length cannula is most suitable for lean individuals. The 9mm cannula is recommended for everyone else. The Safe Needle Disposal System of the Quick-set helps prevent "accidental stickings" when disposing of the introducer needle in a sharps container. The Quick-set works with the Quick-setter to provide optimal insertion every time! Caution: U.S. law restricts this device to sale by, or on the order of a physician.

Clean Room Supplies

USP<797> was developed to reduce or prevent harm to patients that could result from microbial contamination and excessive bacterial endotoxins, large content error and incorrect ingredients from compounded sterile products. USP<797> compliant pharmacies will be required to:

- Wipe down every bottle, syringe and vial that enters the clean room
- Clean and sanitize all buffer room carts, equipment, hoods, walls, surfaces and floors
- Document all compounding activities
- Sanitize gloves
- Conduct sterility and bacterial endotoxin testing for high risk compounding
- Label in compliance with storage requirements
- Clean and sanitize the cleanroom anteroom and shelving

Accel TB™

Accel TB is an EPA registered intermediate level disinfectant that is safe and fast acting with a broad spectrum kill. It is based on Accelerated Hydrogen Peroxide technology, (AHP), a synergistic blend of commonly used, safe ingredients that, when combined with low levels of hydrogen peroxide, dramatically increase its germicidal potency and cleaning performance. This ready to use disinfectant is compatible with an extensive list of common materials, including 316 & 304 stainless steel, natural & silicone rubber, and most plastics. Accel TB is ideal for use on environmental surfaces in pharmaceutical cleanrooms, compounding pharmacies, labs and other GMP facilities.

I.V. Dressings

Invacare® Supply Group

Invacare® Premium Hydrocolloid I.V. Dressing

This unique multi-dimensional design provides enhanced flexibility and conformity to manage challenging anatomical locations. Provides a secure seal that allows for bathing and showering; impermeable to liquids and bacteria. The thin inner surface allows visualization of the insertion site, while the thicker, outer border helps anchor the catheter egress.

Product #	Size	Available UOMs	HCPCS
ISG2163132	Round 4"	Ea,Bx10	N/A

3M

3M™ Tegaderm™ Advanced IV Dressing

Designed specifically to reduce catheter dislodgement and to better conform around the BD Nexiva™ Closed Catheter System. The dressing has reinforced borders and notches designed to create a better seal around the catheter, extend wear time, reduce edge lift, and offer convenience and versatility. Sterile

tape strips are provided for catheter securement. Breathable film allows moisture vapor and oxygen exchange. Transparent dressing allows easy monitoring of IV sites without dressing removal. Unique picture-frame style allows one-handed application and less waste. Sterile, waterproof dressing provides a bacterial and viral barrier to outside contaminants and allows the patient to shower.

Why are Infusions Performed at Home?

- Home infusion has been proven to be a safe and effective alternative to inpatient care for many disease states and therapies.
- For most patients, receiving treatment at home or in an outpatient clinic setting is preferable to inpatient care.

I.V. Supplies

IV Prep Antiseptic Wipes

Provides a clear, one-step antiseptic for IV site preparation as well as a film which may help reduce skin trauma associated with adhesive removal when dressings are changed.

Sharps Compliance

Pitch It® Telescoping IV Pole

SHARPS' unique Pitch-It® IV poles are not only affordable but they also reduce the incidence of improvised gravity-fed infusions. These lightweight, collapsible and disposable poles save money for homecare companies by reducing shipping costs and eliminating the need for cleaning, bagging and tagging poles for reuse. They also eliminate vehicle pollution and the expense of sending drivers to retrieve traditional IV poles from patients' homes. Pitch-It poles are 100% recyclable.

Sharps Compliance

Sharps® Disposable By Mail System®

Complete disposal system for simplified management of bio hazardous waste. Includes a sharps container, a government-approved return sharps mailbox box, a protective 3ml bag liner and a 4-part simplified tracking form. The cost of destruction and mailing, as well as confirmation of destruction, is included in the purchase price. Full sharps container is placed in the pre-paid postage return box and returned to Sharps® treatment facility via the U.S. Postal Service. Upon receipt, Sharps® documents the receipt, weight and destruction of each container and its contents of used syringes. Electronic proof of destruction is made available for your records. PRO-TEC® durable containers. Red with translucent white cover.

18 Gallon Medical Professional System

The new 18-gallon System is a USPS-approved disposal by mail system that be used to collect both biohazard (red bag) waste and existing sharps containers. Dispose of your own sharps containers, or utilize Sharps Compliance, which has sharps containers that can be purchased and used with this system as well. This is also a great system to use to "clean up" those existing sharps containers sitting around. When your 18-g system is full, you can even schedule a Priority Mail pickup at your convenience if you like at www.sharpsinc.com/usps.htm.

Sharps® AssetReturn™ System

The innovative Sharps Asset Return System provides a smart, secure way to facilitate the return of infusion pumps, phototherapy, TENS units, and other expensive equipment to your facility—directly from the patient's home.

This saves employee time, eliminates vehicle emissions from expensive pickup trips, optimizes asset utilization, and reduces the risk of lost equipment. The System's interior foam packaging is specially designed to protect your equipment.
