Reasons to go to the hospital if you have a wound

- Obvious life-threatening wounds (Call 911 for emergency services)
- Any laceration greater than 1/2-inch long that is through all layers of the skin exposing the underlying fat.
- If you cannot stop the bleeding
- If the blood continues to "spurt" from the wound (Apply pressure and go to the hospital's emergency department)
- If you think that there may be something in the wound such as glass, wood, or rust, for example
- If you cannot move your finger or toe in the area of the laceration, or you have lost sensation in the area beyond the laceration
- For any bite wound (human or animal)

From eMedicineHealth

Diabetes can affect every part of the body, including the skin. As many as one third of people with diabetes will have a skin disorder caused or affected by diabetes at some time in their lives. In fact, such problems are sometimes the first sign that a person has diabetes. Luckily, most skin conditions can be prevented or easily treated if caught early.

TYPES OF WOUND DRESSINGS

Wounds heal faster, with less pain and less scarring, in a moist environment. Advanced wound dressings work by hydration (adding moisture to the wound bed) or by absorption (absorbing drainage, thereby keeping the wound bed moist). Choose dressings according to the characteristics of the wound.

WOUND CLEANSERS/DEBRIDERS...

gently cleanse a wound before dressing application. They may contain ingredients that absorb drainage and/or deodorize the wound. Cleansers/debriders are used to remove dead tissue while keeping healthy tissue intact.

HYDROCOLLOID DRESSINGS...

are soft, absorptive, adhesive wafers that become gel-like as they absorb and are best used on lightly to moderately draining wounds. They are waterproof and impermeable to bacteria and contaminants. Easy application. Various thicknesses available. Not recommended for infected wounds.

CHARCOAL DRESSINGS...

have an activated charcoal layer that absorbs wound odor. Also used for wounds that may not heal, such as cancerous lesions. May require a cover dressing or tape to hold in place.

SILICONE GEL SHEETING...

is designed for temporary use in the management of both existing and new hypertrophic scars and keloids.

HYDROGELS...

are transparent and water-based. They hydrate tissue and facilitate debridement using the body's own enzymes. Because of the relatively high water content, there is limited drainage and/or absorption. Some sheets and all gels need a cover dressing and tape to hold them in place and are easy to use. They require no mixing. Not recommended for moderate or heavily draining wounds because of limited absorptive ability.

COMPRESSION DRESSINGS AND UNNA BOOTS...

apply controlled pressure to areas of the body to help control swelling and promote circulation, encouraging wound healing.

FOAM DRESSINGS...

are highly absorbent and generally made from hydrophilic polyurethane foam, offering a moist environment to insulate and cushion the wound. They require a cover dressing and tape, unless they are waterproof with an adhesive border. Conformable as well as comfortable, they will not stick to wounds or leave residue when removed. Can be used for heavily draining wounds.

CALCIUM ALGINATE DRESSINGS...

are derived from seaweed and available as sheets or ropes for packing deep wounds. They absorb moderate to heavy wound drainage and are capable of absorbing many times their own weight. Once applied they form a moist, gel-like covering and always require a cover dressing. Not recommended for lightly draining wounds.

TRANSPARENT ADHESIVE DRESSINGS...

maintain a moist environment that is permeable to oxygen and vapor and impermeable to bacteria and contaminants. Because they are waterproof they may be used on blisters, superficial wounds or wounds with light amounts of drainage. They can also securely protect IV catheter sites. They allow evaluation of wound progress without removal of dressing. Application may be difficult for those with dexterity problems.

COLLAGEN DRESSINGS...

are used for moderate to heavily draining wounds to enhance healing and tissue repair. Collagen dressings can be used on burns, pressure ulcers, scrapes, cuts and dermatologic conditions.

NONADHERENT DRESSINGS...

are available nonimpregnated or impregnated and discourage foreign matter from becoming lodged in the wound bed. They can be used on skin tears, donor sites and skin grafts. Most nonadherent dressings require a cover bandage or tape to hold them in place.

SILVER DRESSINGS...

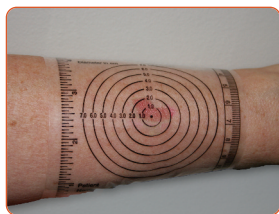

feature broad spectrum antimicrobial action and are effective against a wide range of micro-organisms including MRSA, VRE and Fungi.

Positioning products help relieve pressure.
There are many new positioning products in our Durable Medical Equipment Section.

Wound Care / Gauze Dressings / Bandages & Tape

Wound Care

Invacare Supply Group®

Disposable Wound Measurement Guide
Quick, easy guide measures wounds, stomas, etc: clear plastic, non-sterile.

Product #	Size	Style	Available UOMs	HCPCS
ISG20E4290			Pk250	N/A

Invacare® Cotton Tip Applicators
Applicators may be used for specimen collection, wound measurement and to apply medications.

ISG207475	4" x 75"	Non-Sterile	Pk12,Cs8	A6443

Invacare® Soft Sponge Fenestrated
100% viscose, non-woven, rayon sponge. Effective in reduction of fluid pooling to establish a drier wound site. Pre-cut, U-shaped fenestration fits around most drains, catheters and tubes. Excellent absorbency, fast wicking and low linting. 2 per pack. Sterile.

Product #	Size	Ply	Available UOMs	HCPCS
ISG208022	2" x 2"	6-ply	Ea,Bx35,Cs20	A6402
ISG209144	4" x 4"	6-ply	Ea,Bx25,Cs12	A6402

Skin & Wound Care

Invacare® Dressing Sponge
100% cotton gauze, 2 per pack. Sterile.

Product #	Size	Ply	Available UOMs	HCPCS
ISG208244	4" x 4"	12-ply	Ea, Bx25, Cs24	A6402
ISG208822	2" x 2"	8-ply	Ea, Bx50, Cs30	A6402
ISG208844	4" x 4"	8-ply	Ea, Bx50, Cs12	A6402

Invacare® Gauze Packing Strip

100% cotton gauze. Used for packing or as drainage conduits in wound care management applications, such as nasal or sinus packing, boils, abscesses, fistulas and other draining or tunneling wounds. 1/4" size is also used for dental packing. Sterile.

Product #	Size	Available UOMs	HCPCS
ISG209015	1" x 5yds	Ea, Cs12	A6407
ISG209125	1/2" x 5yds	Ea, Cs12	A6407
ISG209145	1/4" x 5yds	Ea, Cs12	A6407

Invacare® New Sponge

Rayon/polyester non-woven sponge protects and cushions wounds and reduces snagging on sutures. Quickly and efficiently removes fluids with a higher absorption capacity than gauze. Superior wound release ability.

Product #	Size	Packaging	Sterility	Available UOMs	HCPCS
ISG209044	4" x 4"	4-ply Single	Non-Sterile	Pk200, Cs10	A6216
ISG209444	4" x 4"	4-ply 2/Pack	Sterile	Ea, Pk25, Cs24	A6402

Invacare® Soft Sponge

Rayon, non-woven sponge establishes a drier wound site by reducing pooling of fluids. Excellent absorbency and fast wicking with minimal sticking and reduced linting. Sterile.

Product #	Size	Ply	Available UOMs	HCPCS
ISG209622	2" x 2"	6-ply	Ea, Bx35, Cs20	A6402
ISG209644	4" x 4"	6-ply	Ea, Bx25, Cs12	A6402

Invacare® Iodoform Gauze Packing Strip

100% cotton gauze. Used for packing or as drainage conduits in wound care management applications, such as nasal or sinus packing, boils, abscesses, fistulas and other draining or tunneling wounds. Contains 5% Iodoform. Sterile.

Product #	Size	Available UOMs	HCPCS
ISG209101	1" x 5 yards	Ea, Cs12	A6266
ISG209112	1/2" x 5 yards	Ea, Cs12	A6266
ISG209114	1/4" x 5 yards	Ea, Cs12	A6266

Invacare® Xeroform Gauze Dressing

Non-adherent petrolatum blend with 3% Bismuth Tribromophenate on fine mesh gauze. Indicated for use on open wounds, burns, donor sites, cancer resections, wounds and abrasions, surgical incisions, urological and proctological procedures. Conforms and clings to body contours. Convenient peel-open, tamper-proof package. Sterile.

Product #	Size	Available UOMs	HCPCS
ISG20D018	1" x 8"	Ea, Bx50, Cs4	A6222
ISG20D044	4" x 4"	Ea, Bx25, Cs6	A6222
ISG20D059	5" x 9"	Ea, Bx50, Cs4	A6223

Invacare® Oil Emulsion Dressing

Non-adhesive petrolatum dressing. Knitted mesh fabric impregnated with a blend of mineral oil and USP white petrolatum. Primary choice for virtually any draining wounds: skin ulcers, burns, delicate plastic surgery, ER abrasions and lacerations, infected areas, suture lines, episiotomies and circumcisions. Allows free drainage of exudate away from the wound. Convenient peel-open, taper-proof package. Similar to ADAPTIC™ Dressing. Sterile.

Product #	Size	Available UOMs	HCPCS
1 strip/envelope			
ISG20D033	3" x 3"	Ea, Bx50, Cs12	A6222
ISG20D038	3" x 8"	Ea, Bx24, Cs6	A6223

3 strips/envelope			
ISG20D5013	3" x 8"	Ea, Bx36	A6223

Invacare® White Petrolatum Dressing

USP absorbent fine mesh gauze impregnated with USP white petrolatum. Clings and conforms to the wound without sticking. Conformable, soothing and hypoallergenic. Occlusive. Indicated for use on fistulas, stomas, chest tube incisions, skin grafts, circumcisions, abrasions, burns, umbilical cords, thoracic wounds or incisions, or submucous resections. Similar to Vaseline® Dressing. Sterile.

Product #	Size	Available UOMs	HCPCS
ISG20D039	3" x 9"	Ea, Bx50, Cs4	A6223

Bandages & Tape

Invacare® Fixation Tape

Elastic non-woven adhesive fabric to cover dressings; indicated for retention of post-operative wound dressings, gauze and absorbent pads, and to secure catheters and drainage tubes. This highly conformable tape combines security with comfort. It provides reliable fixation and allows joints to be dressed without constraining movement. Invacare® Fixation Tape is radio transparent and coated with a hypoallergenic acrylic adhesive. Soft, skin-friendly and latex- free. Compare to Hypafix® tape.

Advanced Wound Care

Invacare® Aquafiber® Wound Dressing

Aquafiber® is a soft, conformable, highly absorbent, high M (mannuronic acid) calcium/sodium alginate dressing. In contact with wound exudate, it converts to a soft, clear gel, providing an ideal moist wound environment that supports the wound healing process and provides reduced lateral wicking to help prevent excoriation and maceration of the skin. Easy, one piece removal; leaves no residue in the wound. Indicated for moderately to heavily exuding chronic and acute wounds and to control minor bleeding in superficial wounds. Sterile.

Product #	Size	Available UOMs	HCPCS
ISG2113439	2" x 2"	Ea, Bx10	A6196
ISG2113460	4" x 4"	Ea, Bx10	A6196
ISG2113491	6" x 6"	Ea, Bx5	A6197
ISG2113521	12" rope	Ea, Bx5	A6199

Invacare® Silver Alginate Dressing

Silver and Calcium Alginate combined to create broad-spectrum antimicrobial action with enhanced exudate management properties. The dressing has exceptional absorptive capacity and is effective against antibiotic resistant bacteria. Will not discolor the wound bed. Sterile.

Product #	Size	Available UOMs	HCPCS
ISG21ESA2	2" x 2"	Ea, Bx10, Cs10	A6196
ISG21ESA4	4" x 4-3/4"	Ea, Bx10, Cs10	A6197
ISG21ESAR	1" x 12" Rope	Ea, Bx5, Cs10	A6199

Invacare® Calcium Alginate Wound Dressing

For management of wounds with moderate to heavy exudate; gels on contact with wound fluid to form an ideal moist healing environment. The highly absorbent fibers swell, but remain intact for easy dressing removal. Vertical "wicking" minimizes maceration. Sterile.

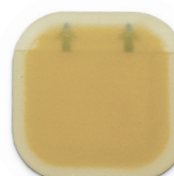

Product #	Size	Available UOMs	HCPCS
ISG211CA2	2" x 2"	Ea, Bx10	A6196
ISGCA1	2g Rope	Ea, Bx5, Cs10	A6199
ISGCA2	4" x 4"	Ea, Bx10, Cs14	A6196

Invacare® Foam Island Dressing

Adhesive foam island dressing consists of a moist vapor permeable membrane with a hydrophilic absorbent foam pad. The bordering membrane is adhesive. Suitable for low to moderately exuding wounds, with the foam center providing both a high degree of absorption and a cushioning at the wound site. Sterile.

Product #	Dressing Size	Pad Size	Available UOMs	HCPCS
ISGFC1	4" x 4"	2" x 2"	Ea, Bx10, Cs10	A6212
ISGFC2	6" x 6"	4.5" x 4.5"	Ea, Bx10	A6213

Invacare® Premium Hydrocolloid Wound Dressing with Border

This moldable dressing is composed of a hydrocolloid adhesive and a low-friction, polyurethane film outer cover. It is impermeable to liquids and bacteria and permeable to oxygen and water vapor. The dressing absorbs wound fluids, swells and forms a gel that covers the wound bed, maintaining moisture and protecting newly formed tissue during dressing changes. For light to moderately exuding wounds; the border won't roll or stick, helping to increase wear time. Sterile.

Product #	Size	Style	Available UOMs	HCPCS
ISG2163095	2 x 2"	Square	Pk4, Bx3, Cs10	A6237
ISG2163118	4 x 4"	Square	Ea, Bx10	A6237

NEW!

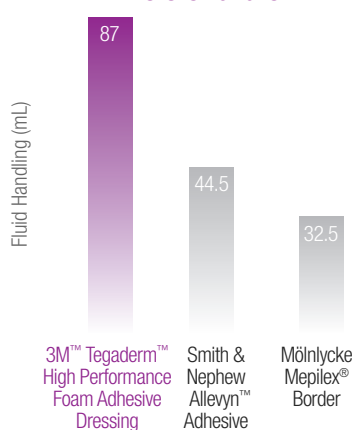

Invacare® Hydrocolloid with Foam Back

Features outstanding moisture vapor transfer rate and absorption while cushioning the wound. Water resistant dressing is primarily indicated for the management of light to moderately exuding pressure sore and leg ulcers. Sterile.

Product #	Size	Available UOMs	HCPCS
ISG2164719	4" x 4"	Ea, Bx5	A6234

High-exudating wounds require
fluid handling that's **off the chart.**

**Median Volume (mL) of
Artificial Wound Fluid (AWF)
Before Failure**

Introducing 3M™ Tegaderm™ High Performance Foam Adhesive Dressing. It delivers the highest fluid handling capacity, outperforming other leading dressings in managing low- to high-draining wounds.

- Adapts to changing wound conditions to create an optimal moist healing environment
- Less evaporative under low moisture conditions to help reduce the risk of desiccation and adherence
- High evaporation where there is excess moisture, helping to prevent maceration
- Award-winning, patented spoke design enables easy, one-handed accurate application

See the evidence.

Wound Care

Invacare® Thin Hydrocolloid Dressing
Semi-transparent dressing is flexible and conformable to body contours, allows for easy monitoring of wound healing without removing the dressing. Waterproof; primarily indicated for the management of superficial, dry/light exuding wounds, post-operative wounds, and abrasions. Sterile.

Product #	Size	Available UOMs	HCPCS
ISGTHC1	4" x 4"	Ea, Bx10	A6234

Invacare® Transparent Film Dressing
Waterproof, breathable, adhesive coated polyurethane film dressing is permeable to oxygen and moisture vapor, but impermeable to bacteria and fluid. For superficial wounds or wounds with light exudate. Easy, two step delivery for placement. Sterile.

Product #	Size	Available UOMs	HCPCS
ISGTF1	2-3/8" x 2-3/4"	Ea, Bx100	A6257
ISGTF2	4" x 5"	Ea, Bx50	A6258

Invacare® Polyurethane Foam Dressing
Highly absorptive, nonadhesive dressing for heavily exuding wounds. Softer and more conformable foam allows for quick and easy shaping to any wound and improves patient comfort and wound protection. The combination of high moisture vapor transport rate and high total exudate absorption protects against maceration, excoriation and leakage and results in fewer dressing changes. Provides waterproof and bacterial barrier. Sterile.

Skin & Wound Care

3M™ Coban™ 2 Layer Compression System

A low-profile system that goes on in just 2 easy steps; consists of an inner comfort layer and an outer compression layer that are fast and easy to apply. After application the two layers cohere together, providing comfortable, effective compression. This thin, lightweight system allows users to wear normal footwear. For management of venous leg ulcers and other clinical conditions where compression is appropriate. Each Kit contains 2 rolls; roll No. 1, comfort layer: 4" x 2.9 yd and roll No. 2, compression layer: 4" x 5.1 yd stretched. May be used for patients with an ABPI \geq 0.8. Latex free.

Product #	Available UOMs	HCPCS
MMM2094	Cs8	A6454

3M™ Coban™ Self-Adherent Wrap

The self-adherent elastic wrap that functions like a tape, but sticks only to itself. Suggested applications include light support and securing, compression dressings and partial immobilization. Caution: This product contains natural rubber latex which may cause allergic reactions.

Skin & Wound Care

3M™ Tegaderm™ Hydrocolloid Thin Dressing
Thin, absorbent and highly conformable. There is a film border on oval sizes that seals to prevent premature dressing failure due to edge lift. May be used on intact skin to protect from friction and protects from contaminants, body fluids, bacteria and viruses. Ideal for superficial, dry to lightly exudating partial thickness dermal ulcers and skin tears, or may be used as a protective covering over fragile skin or newly healed skin.

InterDry™ Ag

InterDry Ag™ Textile with Antimicrobial Silver Complex is a skin fold management system specially designed to manage moisture, odor and inflammation in skin folds and other skin-to-skin contact areas. A knitted polyester textile impregnated with silver complex, InterDry™ Ag textile provides effective antimicrobial action for up to five days and significantly improves the symptoms associated with intertrigo: maceration, denudement, inflammation, itching, erythema and satellite lesions. The textile functions by wicking moisture away to keep skin dry and provides a friction reducing surface to reduce the risk of skin tears and pressure ulcers. Latex-free, 2-year shelf life.

COL3110	4" x 4"	Sterile	Ea,Bx5	A6234

Comfeel® Plus Transparent Hydrocolloid Dressing

Thin, highly flexible, hydrocolloid dressing for friction prevention. Transparent to allow wound visualisation. Contraindicated: third degree burns. Latex Free. Sterile.

Product #	Size	Available UOMs	HCPCS
COL3533	4" x 4"	Ea,Bx10	A6234

NEW!

Biatain Soft-Hold Foam Dressing

Features optimal absorption and retention. Soft and skin-friendly adherent layer covers less than 50% of the foam surface, providing a third hand in application and atraumatic removal, while maintaining superior exudate management. Ideal under compression.

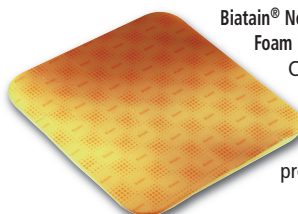

Product #	Size	Available UOMs	HCPCS
COL3470*	4" x 4"	Bx5	A6234
COL3473*	2" x 2.275"	Bx5	A6234
COL3475*	6" x 6"	Bx5	A6234

Biatain® Adhesive Foam Dressing

Super absorbent foam dressing with hydrocolloid-based adhesive border for low to highly exuding wounds including leg ulcers, pressure ulcers, chronic wounds, and skin tears. The dressings may be used throughout the healing process to provide padding and protection for all types of wounds and are well suited for use under a compression device.

Product #	Size	Available UOMs	HCPCS
COL3420	5" x 5"	Bx10	A6212
COL3430	4" x 4"	Bx10	A6212

Biatain® Non-Adhesive Foam Dressing

Consists of superior absorbent foam and semi-permeable, top layer film for optimal moist wound healing and extended wear time. Ideal under compression.

Product #	Size	Available UOMs	HCPCS
COL3410	4" x 4"	Bx10	A6209

NEW!

Seasorb Alginate Dressing with Silver

A fiber-free alginate offering superior strength and absorption. No fibers mean nothing is left in the wound; removes in one piece even when saturated.

Product #	Size	Available UOMs	HCPCS
COL3760	4" x 4"	Bx10	N/A

*Special order item

Skin & Wound Care

SeaSorb™ Soft Alginate Dressing

The unique combination of calcium alginate and carboxymethylcellulose (CMC) forms a cohesive gel that can absorb up to 18 times its own weight in exudate. Once formed, the gel retains exudate, reducing the risk of maceration and making one piece removal easy with minimum patient pain or wound bed trauma. Sterile.

Product #	Size	Available UOMs	HCPCS
COL3710	4" x 4"	Bx10	A6196
COL3740	16" Rope	Bx6	A6199

Biatain® Ag Silver Foam Dressing

Non-adhesive foam dressing with an anti-microbial barrier uses advanced moist wound healing technologies with silver as the active ingredient. Contraindicated for third-degree burns and persons with known silver sensitivities. Latex-Free. Sterile.

Product #	Size	Available UOMs	HCPCS
COL9622	4" x 4"	Bx5	A6209

Comfeel® SEA-CLENS™ Wound Cleanser

A saline-based wound cleanser that can be used instead of normal saline for wound cleansing. No-rinse, isotonic, pH-balanced formula.

Product #	Size	Available UOMs	HCPCS
COL1061	12oz Spray	Ea,Cs12	A6260

WoundDres® Collagen Hydrogel

Rehydrates dry wounds and eschar. Promotes a moist wound environment and autolytic debridement.

Product #	Size	Available UOMs	HCPCS
COL7690	3oz Tube	Ea,Cs12	A6248

Cutaneous malignancies that may masquerade as ulcers

include basal cell carcinoma, squamous cell carcinoma, keratoacanthoma, nodular melanoma, tumor stage mycosis fungoides, lymphomatoid granulomatosis, lymphomatoid papulosis, angiosarcoma, and cutaneous metastases from internal malignancy.

Convatec®

SAF-Gel™ Dressing

Hydrating dermal wound dressing gel with alginate. Designed to promote an optimal, moist environment for the healing process. Stays in place, easy application, saves time.

Product #	Size	Available UOMs	HCPCS
SQB145730	3oz Tube	Ea,Cs12	A6248

SAF-Clenz® AF

SAF-Clenz® AF is intended for cleansing of dermal lesions such as Stage I-IV pressure ulcers, stasis ulcers, diabetic ulcers, post-surgical wounds, first and second degree burns, abrasions and minor irritations of the skin.

Product #	Size	Available UOMs	HCPCS
SQB159712	12oz Bottle	Ea,Cs6	A6260

Kaltostat® Alginate Dressing

Soft, white, non-woven dressing of calcium alginate fiber. Highly absorbent. Converts exudate to a gel/fiber mat and creates a moist, warm environment. May be left in place up to 7 days. Trauma-free removal. Sterile.

Product #	Size	Available UOMs	HCPCS

Examples of fungal infections

of the skin and other external surfaces include athlete's foot, jockitch, ringworm, and candida. These can affect the hair and nails as well. Deep fungal infections invade deeper layers of the skin and hair follicles and can spread to the blood or internal organs.

CarboFlex™ Odor Control Dressing

Advanced, multi-layered dressing effectively manages infected malodorous wounds. Double-knit, activated charcoal cloth layer provides effective odor absorption. Smooth, flexible, water-resistant outer film sleeve keeps charcoal layer dry. Alginate/hydrofiber layer creates moist wound interface; forms gel in the presence of drainage. Soft, non-adhesive wound contact layer conforms comfortably to wound site.

Product #	Size	Available UOMs	HCPCS

UNNA-FLEX™ Elastic Unna Boot

Elastic, stretchable gauze zinc oxide bandage is ideal for venous leg ulcer care. Easy to use. Flexible and comfortable while conforming to the leg.

Product #	Size	Available UOMs	HCPCS
SQB650940	3" x 10yds	Ea, Bx12	A6456
SQB650941	4" x 10yds	Ea, Bx12	A6456

UNNA-FLEX™ Plus Venous Ulcer Kit

Contains one UNNA-FLEX™ Elastic Unna Boot and one 4" self-adherent bandage.

Product #	Available UOMs	HCPCS
SQB650944	Ea, Cs12	A6456

SurePress™ Absorbent Padding

Soft underlayer. For use under compression bandages.

Product #	Size	Available UOMs	HCPCS
SQB650948	4" x 3.2yds	Bx6	A6441

SurePress™ High Compression Bandage

Designed for use over primary dressing. Elasticized bandage consists of cotton/viscous, nylon and lycra. Visual application guides ensure appropriate amount of graduated compression — rectangles become squares when correct extension is reached. Yellow center line aids in 50% overlap. Unstretched.

Product #	Size	Available UOMs	HCPCS
SQB650947	4" x 3.2yds	Ea	A6452

Ulcers can often be avoided by meticulous skin care, relief of pressure over bony prominences and nutritional support. Bedridden people should be turned and repositioned every 2 hours around the clock to avoid complications. Pillows may be used to help with changing positions. Heel and elbow protectors, mattress overlays or convoluted foam mattresses also help.

Wound Care

Covidien

Gauze Dressings

Skin & Wound Care

Kendall™ AMD Antimicrobial Foam Dressings

Developed to support your efforts in managing both moisture and bacterial balance. The dressing is an open cell polyurethane foam dressing and is impregnated with 0.5% Polyhexamethylene Biguanide (PHMB), a highly effective, low toxicity antiseptic. The dressings are effective against gram positive and gram negative bacteria and also yeast and fungi.

Derma Sciences

NEW! XTRASORB™ Super Absorbent Dressing
Dressings have a core of super-absorbent polymer that allows the dressings to absorb significantly increased amounts of fluids versus conventional moist wound dressings. XTRASORB™'s super-absorbent polymers bind fluid and convert it to a gel, allowing the dressings to hold more fluid, and lock fluid inside the dressing, keeping it

away from the patients skin and helping to decrease the risk of maceration. For heavily and extra heavily exuding wounds.

Product #	Size	Available UOMs	HCPCS
DER89545	4 x 5" Nonadhesive	Bx10, Cs10	A6252

MEDIHONEY™ Wound and Burn Dressings

MEDIHONEY™ dressings contain 95% active Leptospermum Honey, which has been shown to have several properties which assist in promoting an optimal healing environment for chronic wounds and burns that have not progressed with basic, first line treatments. Through their high osmolality, the dressings help to cleanse the wound and remove devitalized tissue. The dressings are designed to manage varying degrees of exudates.

Product #	Size	Available UOMs	HCPCS

PolyMem Silver®

PolyMem Silver belongs to an innovative class of adaptable wound care dressings called QuadraFoam®. QuadraFoam dressings effectively cleanse, fill, absorb, and moisten wounds throughout the healing continuum, with the benefit of small particles of silver to protect the dressing from microbial contamination. Indicated for use on diabetic and pressure ulcers, first and second degree burns, skin tears and acute wounds, the small particles of silver protect the dressing from microbial contamination.

Gentell

Gentell® Hydrogel Silver Wound Dressing

Antimicrobial wound gel, combining the unique properties of silver sulfadiazine and an Aloe Vera-based Hydrogel. Silver sulfadiazine decreases bacterial load of both gram positive and gram negative bacteria, inhibits bacteria that are resistant to other antimicrobial agents without harming healthy tissue and is an effective antifungal. Gentell's water & aloe-based formula leaves little residue in the wound.

Product #	Size	Available UOMs	HCPCS
GTL1240	4oz Tube	Ea	A6248

Gentell® Wound Cleanser

No-rinse, non-irritating, pH-balanced cleanser. Aids in the removal of necrotic substances and microorganisms from the wound bed. "Trigger Spray" adjusts from a fine mist to an irrigating stream delivering 8 - 10 PSI of force to dislodge debris.

Product #	Size	Available UOMs	HCPCS
GTL10080	8oz Adjustable Spray Bottle	Ea, Cs6	A6260

Gentell® Hydrogel Wound Dressing

Aloe vera-based, hydrating wound gel protects the wound bed and enhances the moist environment essential to the healing process. Compare to Carrasyn™ V Gel.

Hollister Wound Care LLC

Restore® Wound Dressings with TRIACT™ Technology

TRIACT™ Technology is an innovative formulation in *select* Restore® wound dressings. The unique composition of TRIACT Technology provides a superior environment for moist healing of chronic wounds, significantly reduces pain with dressing changes and promotes easy dressing application and removal.

NEW! Restore Foam Dressing without Border, with TRIACT ADVANCED Technology

Non-adhesive, absorbent dressing manages moderate to moderately heavily exuding acute and chronic wounds. Stays in place due to patented micro-adherent technology, facilitating easier application and reduced risk of maceration. Excellent conformability; virtually pain-free dressing removal. Sterile.

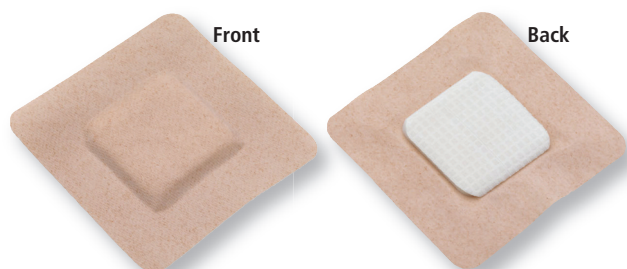

Product #	Size	Available UOMs	HCPCS
HOL509381	4" x 4"	Bx10	A6209

Wound Care

NEW!

Restore Foam Border Dressing Featuring TRIACT ADVANCED Technology

Absorbent dressing with adhesive border manages moderate to moderately heavily exuding acute and chronic wounds. Stays in place due to patented micro-adherent technology facilitating easier application and reduced risk of maceration. Excellent conformability; virtually pain-free dressing removal. Sterile.

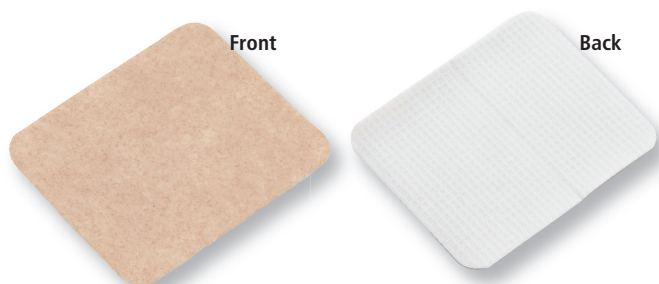

Product #	For Wounds Up To:	Available UOMs	HCPCS
HOL509387	4" x 4"	Bx10	A6212
HOL509388	6" x 6"	Bx10	A6213
HOL509389	6" x 8"	Bx10	A6213

NEW!

Restore LITE Foam Dressing without Border with TRIACT ADVANCED Technology

Non-adhesive, absorbent dressing is thinner than the standard foam dressings. Manages light to moderately exuding acute and chronic wounds. Stays in place due to patented micro-adherent technology, facilitating easier application and reduced risk of maceration. Excellent conformability; virtually pain-free dressing removal. Sterile.

Product #	Size	Available UOMs	HCPCS
HOL509394	4" x 5"	Bx10	A6210

NEW!

Restore Non-Adhesive Foam Dressing with TRIACT Technology

Non-adhesive, absorbent dressing indicated for the treatment of all types of moderate to heavily exuding chronic and acute wounds. Super-absorbent foam with soft, semi-permeable backing. Sterile.

Product #	Size	Available UOMs	HCPCS
HOL509343	4" x 4"	Bx10	A6209

NEW!

Restore TRIO Absorbent Dressing with TRIACT Technology

All-in-one absorbent dressing with adhesive border that incorporates Triact non-adherent layer. Flexible, comfortable, and conformable for versatile use. Indicated for low exuding acute and chronic wounds, including dermabrasions and minor cuts and burns. Apply directly to the wound – no need for a secondary dressing. Sterile.

Product #	Size	Available UOMs	HCPCS

HOL509374	6" x 8"	Bx10	A6238

NEW!

Restore DUO Absorbent Dressing with TRIACT Technology

Absorbent, non-adhesive dressing that incorporates Triact non-adherent layer. Flexible, comfortable, and conformable for versatile use. Indicated for low exuding acute and chronic wounds, including skin tears. Apply directly to the wound and cover with secondary dressing. Sterile.

Product #	Size	Available UOMs	HCPCS
HOL509376	4" x 5"	Bx10	A6235

NEW!

Restore Hydro-Shield Foam Dressing

Waterproof and bacterial barrier protection in a comfortable foam dressing. Waterproof backing allows the patient to bathe and helps prevent strike-through. Backing is a bacterial barrier to help keep harmful contaminants away from the wound. Microporous hydrophilic structure of foam provides excellent absorption and retention, even under compression.

Product #	Size	Available UOMs	HCPCS
HOL529301	4" x 4" without border	Bx10	A6209
HOL529304	4" x 4" with border	Bx10	A6212

Skin & Wound Care

Restore® Contact Layer Dressing with TRIACT™ Technology

Sterile, non-adhesive, non-occlusive wound contact dressing. Indicated for low to moderate exuding partial- and full-thickness wounds. Ideal to use on wounds with fragile surrounding skin. Apply directly to the wound and cover with a secondary dressing.

Product #	Size	Available UOMs	HCPCS
HOL509338	4" x 5"	Ea, Bx10	A6207

Restore® Contact Layer Silver with TRIACT™ Technology

Sterile, non-adhesive, non-occlusive antimicrobial wound contact dressing. May help to reduce infection in low to moderately exuding partial- and full-thickness wounds. Shown to be effective against bacteria most frequently associated with wound infections. Apply directly to the wound and cover with a secondary dressing.

Product #	Size	Available UOMs	HCPCS
HOL509341	4" x 5"	Bx10	A6207

Restore® Adhesive Foam Dressing with TRIACT™ Technology

Sterile, semi-permeable, absorbent dressing with adhesive border. Manages moderate to heavily exuding chronic and acute wounds. Super-absorbent foam pad ensures drainage of exudates and helps protect the skin around the lesion from maceration. Soft, semi-permeable backing.

Product #	Size	Pad Size	Available UOMs	HCPCS
HOL509347	4" x 4"	1.5" x 1.5"	Ea, Bx10	A6212

Restore® Hydrocolloid Dressing with Foam Backing

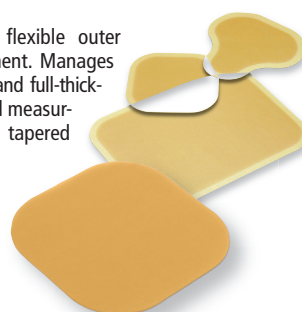

Sterile, occlusive dressing with white foam backing. For low friction areas with moderate exudate. Includes disposable wound measuring guide.

Product #	Size	Available UOMs	HCPCS
HOL519930	4" x 4"	Bx5	A6234

Restore® Hydrocolloid Dressing

Conformable occlusive dressing with flexible outer layer. Maintains moist wound environment. Manages minimal to moderate exudate in partial and full-thickness wounds. Includes disposable wound measuring guide. Available with or without tapered edges and specialty shapes.

Product #	Size	Available UOMs	HCPCS
HOL519953	4" x 4" without tapered edges	Ea, Bx5	A6234
HOL519956	4" x 4" with tapered edges	Ea, Bx5	A6235
HOL519959	17 sq inch triangle w / tapered edges	Bx5	A6234

Restore® Extra Thin Hydrocolloid Dressing

Thinner occlusive dressing with flexible backing. Maintains moist wound environment. Manages minimal exudate in shallow wounds and protects skin from friction injury. Includes disposable wound measuring guide.

Product #	Size	Sterility	Available UOMs	HCPCS
HOL519921	4" x 4"	Sterile	Ea, Bx5	A6234

Restore® Calcium Alginate Dressing

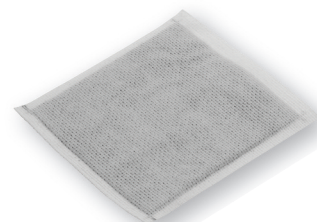

Highly absorbent. Made from calcium sodium alginate, creating conformable protective gel when in contact with exudate. Forms moist wound interface. Remains intact when saturated, so it is removed in one piece.

Product #	Size	Available UOMs	HCPCS

Medi-Tech International

Spandage Tubular Dressing
Latex-free tubular elastic retainer net replaces adhesive tapes and wraps for holding both wet and dry dressings firmly in place. Benefits include no allergic reactions, elimination of the skin stripping and excoriation caused by tape removal, no wet tape or adhesive residue. Dressing changes are faster, easier and more comfortable. 2.5 yard roll.

Molnlycke Healthcare LLC

Melgisorb® Ag
Melgisorb® Ag is a highly absorbent alginate dressing with CMC and ionic silver that kills bacteria for up to four days. The superb wet strength of the alginate fibers do not allow the dressing to disintegrate in the wound bed so it may be removed easily in one piece. Melgisorb® Ag is ideal for deep, highly exuding cavity wounds at risk of infection, such as leg ulcers, pressure ulcers, diabetic and neuropathic ulcers, graft and donor sites, surgical wounds, and trauma injuries.

Product #	Size	Available UOMs	HCPCS
MOL255100	4" x 4"	Bx10, Cs10	A6196

Mepilex® Ag
Highly absorbent foam dressing featuring Safetac® soft silicone technology and silver. Effective sustained release of silver for up to 7 days; rapid silver release begins inactivating pathogens within 30 minutes. Absorbs exudate effectively even under compression bandages and minimizes the risk of periwound skin maceration and erosion.

Product #	Size	Available UOMs	HCPCS
MOL287100	4" x 4" (10 x 10cm)	Bx5	A6209

Mepitel®
Atraumatic contact layer featuring Safetac® soft silicone technology that will not stick to moist tissue such as a wound bed, but adheres gently to intact skin. Ideal for skin tears, fixation of grafts, traumatic wounds, partial-thickness burns, painful skin conditions with blisters, and wounds in granulation phase.

Product #	Size	Available UOMs	HCPCS
MOL290799	3" x 4"	Ea, Bx10, Cs4	A6206
MOL291099	4" x 7.2"	Bx10, Cs7	A6207
MOL292005	8" x 12"	Bx5, Cs6	A6208

Mesalt®
A sodium chloride, impregnated dressing that helps stimulate the cleansing of moist necrosis (slough) in draining and infected wounds. Absorbs exudate, bacteria and necrotic material from the wound into the dressing. Intended for the management of moderate to heavily draining and/or infected wounds and deep cavity wounds such as pressure ulcers and surgical wounds.

Product #	Size	Available UOMs	HCPCS

Smith & Nephew®

Advanced Wound Care

Iodoflex™ Cadexomer Iodine Gel Pad Dressing

Easy to apply. Delivers a premeasured amount of cadexomer iodine. Flexible; conforms to wound shape. Easily removed without disturbing delicate new tissue. Change in pad color from brown to yellow-gray signals a need for dressing change.

Product #	Size	Available UOMs	HCPCS
UNS6602133005	4cm x 6cm (5g)	Bx5	A6262
UNS6602134010	8cm x 6cm (10g)	Bx3, Cs12	A6262

Skin & Wound Care

Iodosorb® Cadexomer Iodine Gel

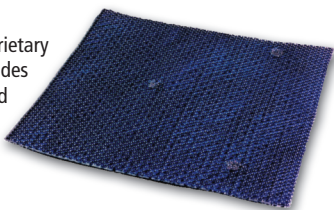

The only wound gel that inhibits bacterial growth as it absorbs exudate. Specially formulated for use on wet, exuding ulcers, diabetic and venous ulcers, pressure sores and infected wounds. As absorption occurs, the cadexomer releases iodine, which reduces the bacterial load without affecting granulating tissue.

Product #	Size	Available UOMs	HCPCS
UNS6602125040	1.4oz Tube	Ea, Cs12	A6261

Acticoat™ Burn Dressing

Acticoat™ Burn Dressing with proprietary antimicrobial silver nanocrystals provides 3 days of unsurpassed, fast-acting and long-lasting antimicrobial barrier control.

Profore® Lite Reduced Compression Bandaging System

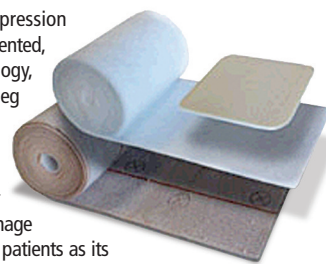

Profore® Lite is a multi-layer compression bandaging system comprised of a wound contact layer and three bandages, offering reduced compression from the original Profore® Multi-layer High Compression Bandaging System. Specifically designed for the management of "mixed" etiology leg ulcers where the patient has been identified to have some degree of arterial impairment which prevents the use of full compression. Kit contains everything necessary for the application of graduated compression therapy.

Product #	Available UOMs	HCPCS
UNS66000771	Cs8	A6027, A6441, A6443, A6449, A6454

PROGUIDE® Bandage System

PROGUIDE® is a Multi-Layer, High-Compression Bandaging System, incorporating the patented, revolutionary "Vari-Stretch*" Technology, indicated for the management of venous leg ulcers and associated conditions on patients who have been shown to have venous hypertension and an ankle brachial pressure index (ABPI) of 0.8 or higher. May be used to effectively manage venous leg ulcers on mobile or immobile patients as its elastic nature provides sustained, graduated levels of compression even if the patient is at rest.

What are Chronic Wounds?

- Wounds which do not heal within an anticipated time frame
- May linger for weeks, months or years
- Involve large tissue loss
- Frequently accompanied by infection or nutritional disorder
- Pressure ulcers and venous leg ulcers are the two largest categories

Wound Care

Southwest Technologies

Elasto-Gel™ Hydrogel Occlusive Dressing
Provides a moist healing environment. Soft and pliable, stretches with movement, absorbs secretions, reduces odor and does not liquefy into the wound. Reduces need for frequent changes. Other sizes available special order.

ACTISORB® Silver 220 Antimicrobial Binding Dressing

Combining broad-spectrum antimicrobial action with bacterial toxin management and odor control, ACTISORB® Silver 220 dressing may help reduce infection in partial and full-thickness wounds. Embedded silver particles kill bacteria and fungi, while a highly porous activated charcoal layer binds toxins and odor causing molecules. Exudate is allowed to flow freely through to a secondary absorbent dressing; the outer nylon sleeve facilitates removal with minimal adherence to the wound.

FIBRACOL® PLUS Collagen Wound Dressing with Alginate

Advanced wound care dressing with 90% collagen composition. Twice as absorbent as traditional Fibracol® Collagen-Alginate Dressing. Combines with exudate to maintain a moist wound environment enabling a rapid rate of healing. Non-adherent, removes easily and leaves wound free of fiber. Maintains initial integrity when wet. Soft, conformable sheet can be cut to fit any size wound. Available in rope to pack deep wounds.
